An In-depth look at Blood Sugar and your Hormones

Cuteness is a subjective term describing a type of attractiveness commonly associated with youth and appearance, as well as a scientific concept and analytical model in ethology, first introduced by Konrad Lorenz. Lorenz proposed the concept of baby schema (Kindchenschema), a set of facial and body features, that make a creature appear "cute" and activate ("release") in others the motivation ...

Saliva Hormone Testing. Harvard and University of Minnesota Medical School graduate Dr. John Lee, progesterone use pioneer and expert, was very adamant that testing for hormones should be done through saliva testing, not blood testing (almost all doctors will test the blood).

Restore Hormonal Balance for Improved Fertility

Infants and children can be touch aversive. For example, common lore suggests that children with autism respond negatively to touch. However, we have shown that children with autism benefit from massage by having fewer sleep problems (Escalona et al., 2001, Field et al., 1997) and being less inattentive in the classroom (see Fig. 1).Touch defensiveness has also been observed in children with ...

Touch for socioemotional and physical well-being: A review

Dog behavior is the internally coordinated responses of individuals or groups of domestic dogs to internal and external stimuli. It has been shaped by millennia of contact with humans and their lifestyles. As a result of this physical and social evolution, dogs, more than any other species, have acquired the ability to understand and communicate with humans and they are uniquely attuned to ...

What is a Puppy Mill? Puppy mills are an urgent, widespread problem. There are an estimated 15,000 puppy mills in the U.S. alone. In these mass-production factories, dogs are forced to produce litter after litter of puppies, supplying nearly 100 percent of the dogs sold in pet stores and directly to consumers online and through newspaper ads.

Being a Holistic Nutritionist, one of the questions I frequently get asked is how to balance hormones naturally. A whole foods diet, blood sugar balance and optimal endocrine function are at the foundation for hormonal balance and by far the most important starting place, but there are other ways to support the fluctuating hormones that ebb and flow throughout the month as well.
